# Join Webinars to Learn About Three Relay Services

Relay NC offers different webinar topics. These topics are for people with hearing loss and/or speech difficulties as well as for agencies and advocates. The following are the topics:

Relay Conference Captioning (RCC)

Learn about Relay Conference Captioning (RCC) for webinars and conference calls. The RCC service allows you to read live captions directly on your laptop, tablet, or mobile device.

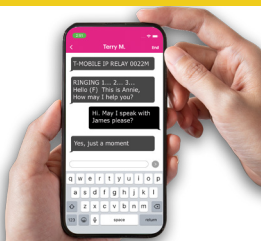

Speech-to-Speech (STS)

Speech-to-Speech (STS) is for people with speech disabilities or those using voice synthesizers. It covers STS features, how to use STS services, and tips for making the most of the service.

Internet Protocol (IP) Relay

This service is for people who have hearing loss or speech disability by allowing a relay operator to read their typed messages aloud during phone calls.
